

Contribution Journal Report for Lab 05

Prepared for Prof. Vishwantha Rao, HCC ITAI 1371 Machine Learning

Prepared by FA26_ML_6171_16347 3_ITAI1371 Group

18-Sep-2026

This report was prepared for Lab 05 (L05) for ITAI 1371 Machine Learning, by the group FA26_ML_6171_16347 3_ITAI1371.

Members of the group include the following students:

- Carmen Petronila Esono Afang
- Yuanyuan Kou
- Irene “Alex” Ramos
- Eric Roberson
- Xiomara Torres

Please refer to the ReadMe.MD file at <https://github.com/ericjroberson-HOU/ITAI-1371-ML-Labs> for intellectual property used in all labs for the course.

Thank you for the opportunity to prepare this reflective journal report. Individual contributions follow.

- **Eric Roberson** - Performed each of the following tasks for this lab:
 1. Created folders on OneDrive for upcoming lab.
 2. Sent an announcement to the team regarding deadline to submit assignment and instructions to update to the Reflection & Contribution Journals, and then synced up with Irene “Alex” Ramos to mention the next assignment on GroupMe.
 3. Downloaded the file .IPYNB file for the lab and parsed it myself for my own learning.
 4. Updated the contribution and reflection journals with my own input.
 5. Took responsibility for converting the files on OneDrive and uploading the .PDF files to GitHub before 11PM on the due date.
 6. Synced up with Irene “Alex” Ramos about submitting the assignments. Everyone finished early on the 18th.
- Carmen Petronila Esono Afang
 1. I helped identify missing values in the Titanic dataset and learned how to handle missing values in the **Age** column by using the median.

2. I worked on converting categorical data, such as **Sex** and **Embarked**, into numerical values that can be used by machine learning models.
3. helped apply **StandardScaler** to numerical features such as **Age** and **Fare** so they could be placed on a similar scale.
4. I reviewed the results of the lab and contributed to writing the reflection journal by explaining what I learned about data preparation and how these techniques can be used in real-world applications.

- Yuanyuan Kou

1. Reviewed the lab instructions and completed the notebook tasks in order.
2. Checked the missing values in the Titanic dataset.
3. Calculated the median age and filled in 177 missing values in the Age column.
4. Used One-Hot Encoding for the Sex and Embarked columns.
5. Applied StandardScaler to the Age and Fare columns.
6. Checked the output after each step to make sure the code worked correctly.
7. Answered the three Knowledge Check questions in my own words.
8. Reviewed my work before sharing it with the group.

- Irene “Alex” Ramos

1. Completed Google Colab
2. Submitted Colab into Sharedrive
3. Communicated with team on Group me with assignment due date
4. Notified Eric of submission into Sharedrive to submit to Github

- Xiomara Torres

- Personal Reflection
- Completed Google Collab Notebook
- Reviewed completed work to ensure it was ready for submission.

This concludes our contribution journal for ITAI 1371 ML Lab 05, which was uploaded to [GitHub](#) on 18-Sep-2026.
